WIRE FEEDER 4 ROLLERS

The best industrial welding solution

WF4R

Detail view

General features

Automatic motor driven wire feeding system ensuring precision and flexibility even at very low revolutions, thanks to the encoder speed control.

Modular application, for TIG and Plasma welding, with cold wire integration.

Thanks to the PLC electronic management system and the Ethernet communication port, **WIRE FEEDER 4 ROLLERS** offers a high level of interfacing and the possibility of PC and Industry 4.0 smart system managed operation (OPTIONAL).

The whole system has been conceived and built for industrial use, and for use with gloves, thanks to the “**industrial remote control**”, which makes setting the calibration parameters by the operator in the field easier and quicker without the need to remove gloves.

Automation Solutions

Technical features

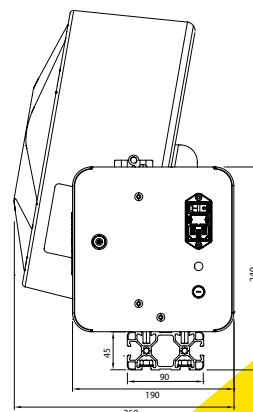

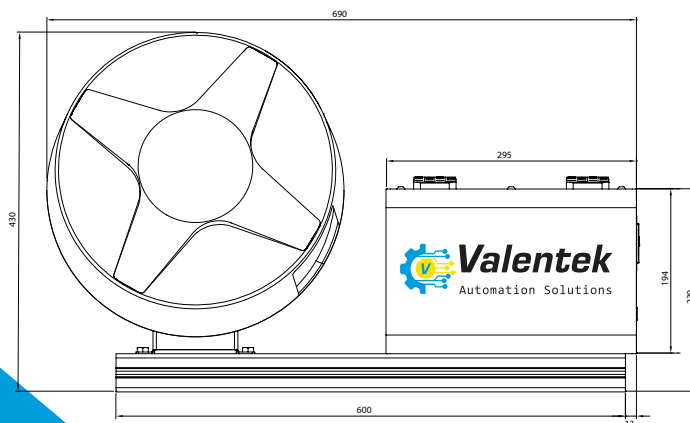

Electric power supply	230VAC 50Hz
Electric consumption	100 W
Wire speed	from 110 to 3560 mm/min
Weight without wire	15 kG

Industrial remote control

Dimensions

Dimensions	L = 690mm	H = 430mm	P = 260mm
